

NOSTR

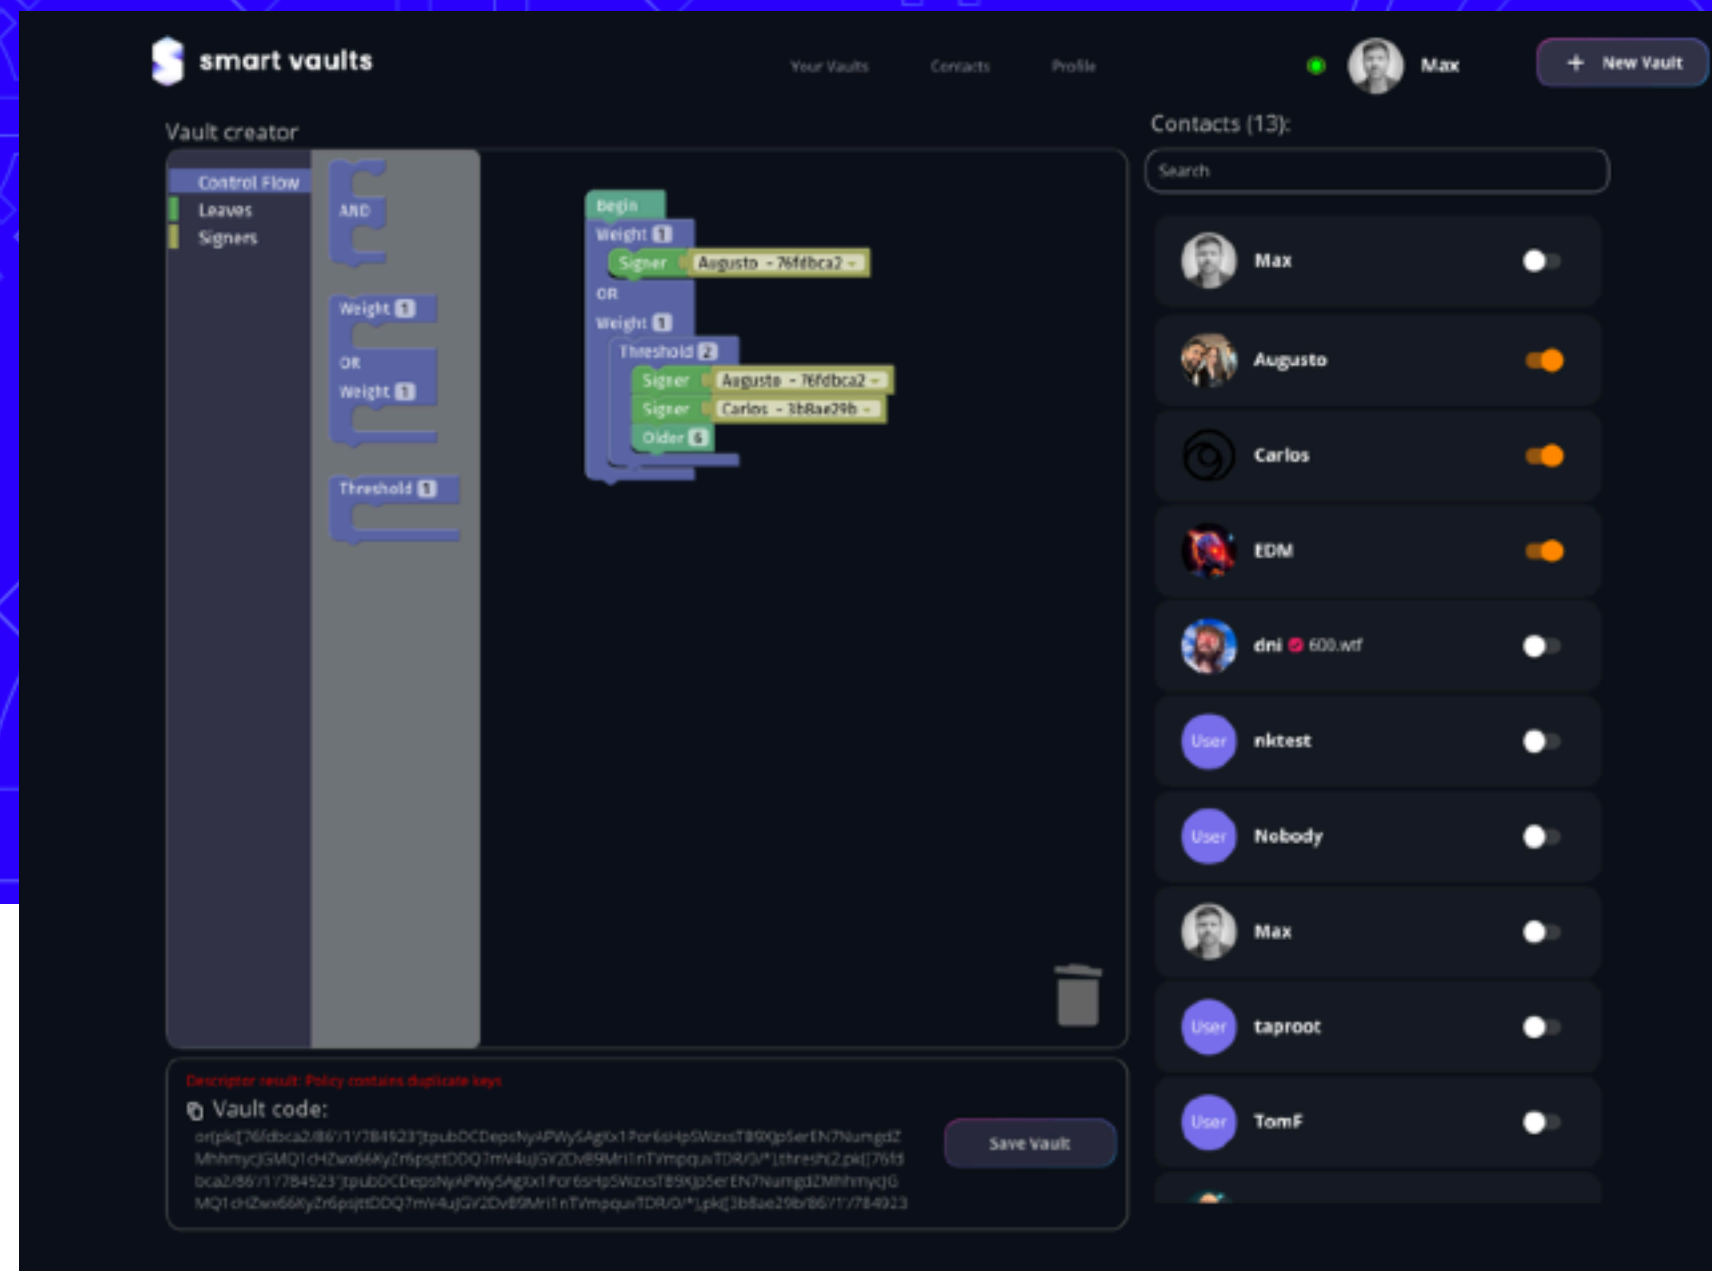

= Notes and Other Stuff Transmitted by Relays

Smart Vaults uses Nostr relays to

- Share public keys among vault members
- Transmit vault metadata (bitcoin output descriptors)
- Coordinate signatures on partially signed bitcoin transactions (PSBTs)

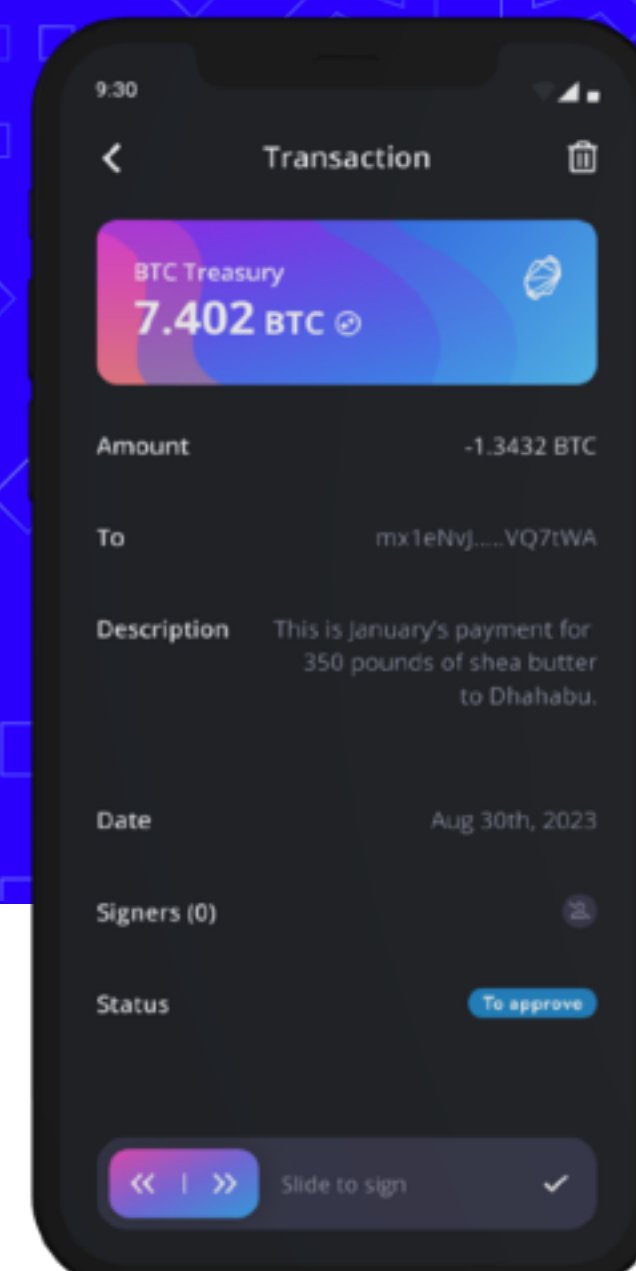

Interoperable Smart Wallet Ecosystem

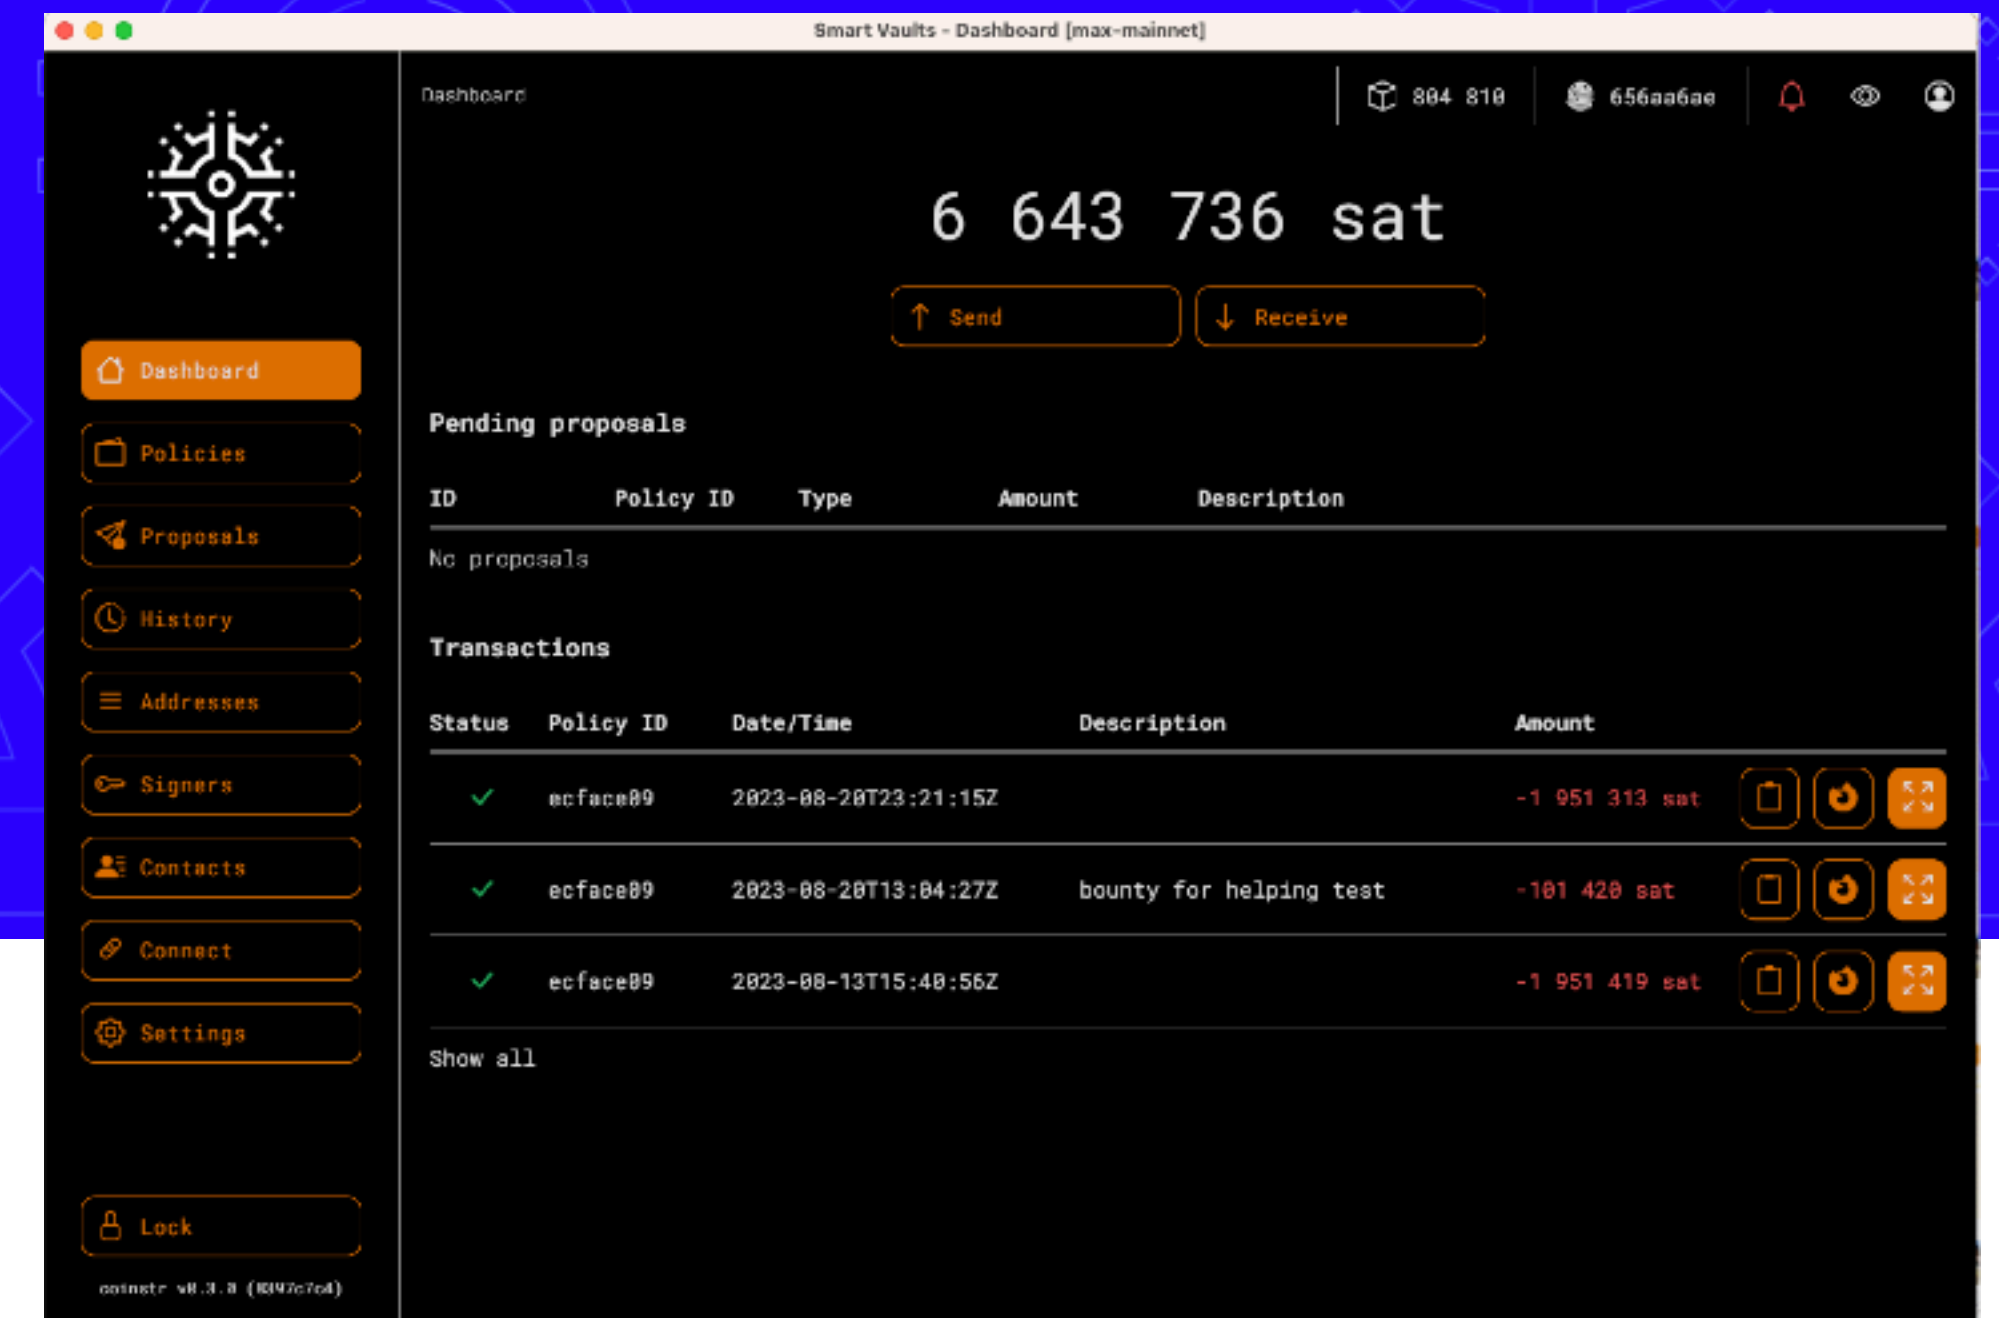

Web Client & Advanced Vault Builder

Javascript & WASM SDK

Native iOS & Android

Desktop Application (rust)

Rust SDK & CLI

Smart Vaults Protocol (defines handling PSBTs over Nostr relays)

Smart Vaults

Your Bitcoin. Your Rules.
